

# Advanced Trailer Maintenance

Well-maintained fleets stay on the road longer, which makes them more profitable. The problem is that maintenance is usually reactionary—trailers don't have work done until something has already gone wrong, which puts that trailer out of commission and off the road. With advanced trailer telematics, there are easy ways to know the moment something goes wrong with brakes, lights, or tires, or even before it does. So you can better plan maintenance for your entire fleet.

## Road Ready Advanced Trailer Maintenance Package

### SENSORS

- MCU
- ABS & Tire Warning Sensor
- LODS
- SmartBridge Integrator + Weight, Tire Pressure (and Automatic Inflation), Wheel-End Health, Stemco Hubodometer (external mileage monitoring)

### BENEFITS

- Improved safety for drivers, other road users, equipment, and cargo
- Reduced unscheduled downtime and fewer roadside repairs
- Reduced costs from failed inspections
- Reduced CSA citations

## Case Study: Maverick Transportation

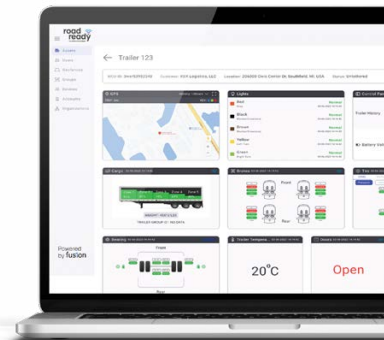

LITTLE ROCK, AR

**Planned versus unplanned maintenance** plays a significant role in the implementation of telematics in transportation. Maverick Transportation uses Road Ready to track Vehicle Maintenance Reporting Standards (VMRS) for better insight into their maintenance program. By tracking ABS, lights, tires, and wheel-end info, this data will be **their first step** towards more strategic repair planning.

Currently, transportation providers are charged by maintenance vendors just for checking an asset. With Road Ready's advanced telematics, Maverick can get their units into queue **while already knowing what they need**—and are targeting a reduction of 20-30% in maintenance cost per mile.

"We want to evolve our maintenance program. The old way of thinking worked for a while. Looking forward, that's not the right path."

- Mike Jeffress, VP of Maintenance, Maverick Transportation

## Get Started

If this sounds like a problem you're experiencing with your fleet and would like to see how Road Ready can make a difference for you, contact us today.

Road Ready packages start at \$14/month, with no initial hardware or setup fees.

Call us at **(866) 523-3556**, or send an email to **[sales@rrtelematics.com](mailto:sales@rrtelematics.com)** to get started.
