

Better Fleet Visibility starts here

How modular trailer telematics from Road Ready help you track, optimize, and protect your fleet.

Complete fleet management – at your fingertips

Smart trailer telematics give you instant visibility into what matters most — from asset location and cargo status to tire pressure and wheel-end health. With Road Ready, you get modular solutions built around your fleet, delivering actionable data that helps reduce downtime, protect freight, and maximize utilization.

Solving real fleet problems

From missed pickups to unplanned maintenance, trailer inefficiencies cut into your bottom line. Road Ready addresses the most common, and costly, fleet issues head-on.

Uncertainty about trailer location?

Get live tracking with movement history and geofence alerts.

Wasted capacity or idle trailers?

Identify underused assets with cargo detection and mileage monitoring.

Costly blowouts?

Monitor tire pressure and inflation activity to reduce tire-related failures.

Hidden maintenance issues?

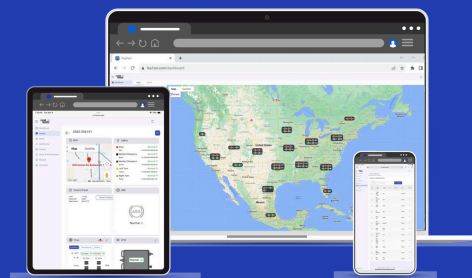

Detect early signs of wheel-end failure with temperature alerts.

Theft or tampering?

Get notified when doors open or cargo moves unexpectedly, even when untethered.

Built to help you make smarter fleet decisions

With Road Ready, you gain insights that drive performance.

- Reduce downtime and avoid costly repairs
- Protect cargo with real-time security updates
- Optimize trailer turn times and reduce detention
- Maximize trailer utilization and return on investment
- Receive GPS and geofence alerts automatically
- Stay compliant with automated reporting tools

Solutions at-a-glance

Our modular telematics system is built to fit your fleet's exact needs. Activate the solutions that matter most to your fleet.

Track & Trace

Trailer location, movement history, and geofencing

Cargo Monitoring

Detects cargo presence, door events, and movement alerts

Tire Health

Monitors tire pressure and inflation system activity

Wheel-End Health

Measures hub temperature to help prevent failures

Mileage Monitoring

Captures trailer mileage data for maintenance/service plans

Why do fleets choose Road Ready?

Road Ready was built specifically for trailers, not retrofitted from tractor platforms, so every part of the system works with your operations.

- Modular and scalable for fleets of all sizes
- Compatible with dry vans, reefers, flatbeds, tankers, and chassis
- Seamless integrations with P.S.I., SKF, Geotab, Right Weigh, and more
- U.S.-based technical support and customer service teams

Ready for better fleet visibility?

Discover how Road Ready can help you reduce downtime, protect cargo, and boost operational efficiency ... all from one easy-to-use platform
